

Basic Blue

ACOUSTIC FOAM UNDERLAYMENT GREAT CUSHION BETWEEN FLOOR & SUBFLOOR BUILT-IN VAPOR BARRIER

BASIC BLUE

is the most widely used underlayment needed for your laminate or engineered floor. Basic Blue supports all brands of floating floors. With its attached vapor barrier, Basic Blue eliminates the need for a separate moisture barrier and protects from harmful moisture vapor. Basic Blue is designed with a polyethylene foam to provide cushion between your floor and the sub-floor. Overall a great odorless, cost efficient solution for your floors.

ACOUSTIC FOAM UNDERLAYMENT
