

IMPORTANT! **PRE-MATCH TRIMS TO THE FLOORING PLANKS BEFORE INSTALLATION BEGINS.**

Hard surface flooring such as laminate, SPC, and WPC are pictures of wood flooring. Wood being a product of nature contains grain, color and tone variations.

TRIM MATCHING: Trim pieces are VISUALLY SIMILAR but may be scientifically different species (*i.e. maple vs. birch*). Trim pieces **MUST** be matched **PRIOR** to installation in order to pick out planks that will closely match the flooring. Pre-matching trims to the flooring planks is the *sole responsibility* of the person installing the flooring.

WOOD TRIMS ONLY: All wood trims are custom-made for your specific order to match your flooring. They **CANNOT** be returned after they have been cut.

EXAMPLE OF TRIM MATCHING DURING INSTALLATION.
